

Letter of Notification

Dear Customer,

This communication addresses the performance of IntelliSwab® with SARS-CoV-2 variants.

As part of OraSure's response to the continued emergence of SARS-CoV-2 variants during the pandemic, we have assessed IntelliSwab® performance for a number of these variants. Specifically, OraSure has tested IntelliSwab® with the past and present **CDC Variants of Concern*** listed below:

We have shown the ability to detect:

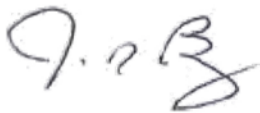

- **Alpha, B.1.1.7**
- **Beta, B.1.351**
- **Gamma, P.1**
- **Delta, B.1.617.2**
- **Omicron, B.1.1.529, BA.1, BA.2, BA.2.12.1, BA.3, BA.4, BA.4.6, BA.5, BQ.1, BQ.1.1, XBB.1, and XBB.1.5**

IntelliSwab® was tested using recombinant proteins containing the relevant mutations as well as live viral isolates of the relevant strains. Testing was conducted at OraSure and by third party laboratories including a collaborative study with NIH demonstrating that IntelliSwab® detects the Omicron variant in live clinical samples.

Name: Jody D. Berry
